Dorothy,  
Chaparral sent an updated Well Operation & Geologic Data page for their application for OS6273.085. I am forwarding it to you along with a new technical review sheet so the file can be updated. It still passes technical review. Can you update me on the status of the Authorization to Inject for this well please?

Chris,

We have updated the injection interval on the NBU #6-W23 to reflect the production casing set @ 2918'. If you would please, can you accept this geo page before final approval of the permit?

Thanks!

Rosalind

**Subject:** RE: NBU #6-W23 Schematic

Chris,

I forgot to add, that since we have found production casing at 2918' instead of 2944' we are re-evaluating our injection zone top. Jeff, our geologist should get back to me sometime this morning.

Thanks,

Rosalind
